Ministerial Advisory Panel

Dear Sirs:

Re: LIFO Review

Our company has provided goods and services to the deep sea shrimp fishing fleets that operate off the shores of Newfoundland & Labrador since 1985.

These fleets provide year round employment for their crews. Wages earned are spent in local communities on a year round basis.

These fleets purchase goods and services, such as food, fuel, safety clothing and equipment, repairs and maintenance, and pay corporate income and other taxes to the various levels of government.

Limiting the shrimp fishery to a seasonal basis would adversely and negatively affect many fishers whose livelihood would be drastically decreased or indeed completely eliminated. Also local, provincial and federal governments would have a decreased revenue stream.

Current employment opportunities in Newfoundland & Labrador can only worsen if deep sea shrimp fishing is discontinued.

We therefore support the continuation of the offshore deep sea shrimp fishing fleets' operations off the shores of Newfoundland & Labrador.
